TEMPLATE CREATION

After opening the program WhiteRIP click the icon at the top of the program "Template", we go to press the default icon and select the item "Full Table".

Let's click the four dots in the upper left, we select "Template" and then "Template Manager", we will display the window "Model Manager" and we will click the green symbol "+" of the column "Group", we name the group we want to create and select it.

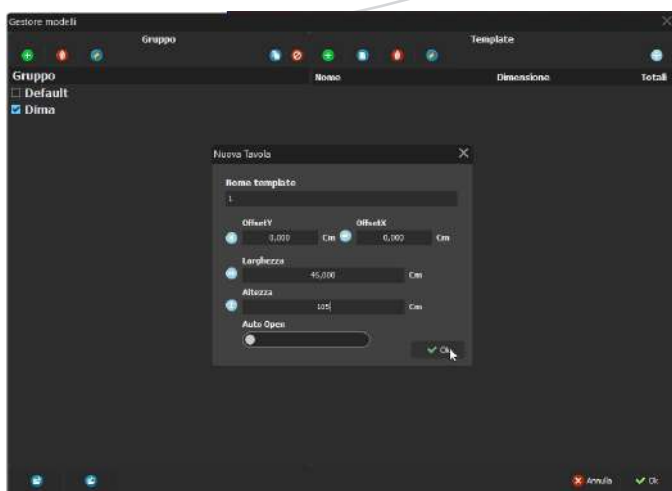

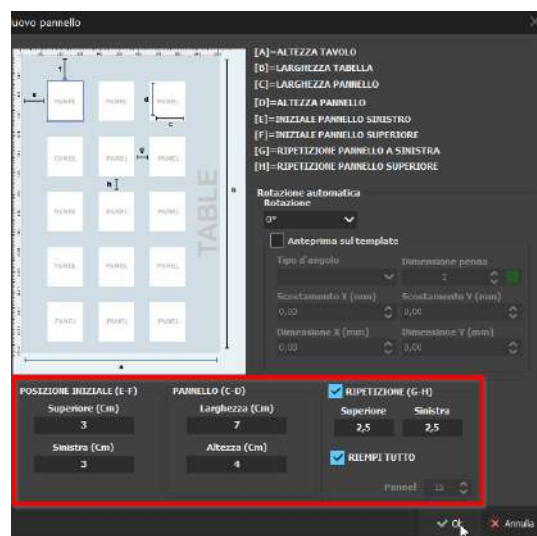

Indicative image

Click the green symbol "+" of the column "Template", will appear the window "New Table" to which we will give a name, a width and a height.
In the "New Panel" window we will display the "START POSITION (E+F)", the "PANEL (C+D)", the "REPEAT G+H" and the "FILL EVERYTHING" to which we will give the values to us interested.

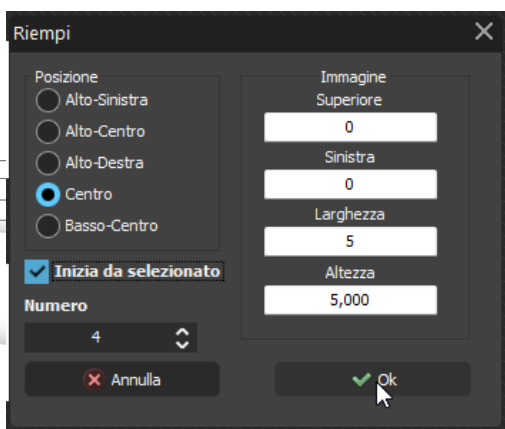

Indicative image

We select on the top left icon under the four dots the panels we made.

In the Home page click "Open" and import the images, go back to Template, right click on the image and select "Fill image", select the Position, decide the width and height of the image, the number of images we want to play and activate "Start from selected" if we want to start from the panel we selected.
